

TALIDAH NUR KEYESA

Junior Full-Stack Developer
Surabaya, Indonesia | talidahnurkeyesa@outlook.com

[linkedin.com/in/talidah-nur-keyesa](https://www.linkedin.com/in/talidah-nur-keyesa) | github.com/keyesa112 | keyesa-portfolios.pages.dev/

PROFESSIONAL SUMMARY

Junior Full-Stack Developer with experience in developing web applications and using AI technologies to simplify workflows, automate tasks, and improve work efficiency. Strong analytical, problem-solving, communication, and collaboration skills gained through academic and professional projects.

EDUCATION

Universitas Airlangga

2022 - Aug 2026 (Expected)

Undergraduate Informatics Engineering Student, GPA: 3.70/4.00

Relevant Coursework: Programming, Database Programming, Machine Learning, Artificial Intelligence, Enterprise Resource Planning (ERP).

TECHNICAL SKILLS

Programming & Frameworks: PHP, Laravel, Python, Flask, JavaScript, Node.js, Go, Wordpress (CMS)

Databases: PostgreSQL, MySQL, MongoDB

Deployment & Infrastructure: VPS Management, cPanel, Cloudflare Domain & DNS Configuration

Tools: Git, Codex CLI (Automation), Qwen 8B VLM (Video Processing), Cosmos3, Google Looker Studio

PROFESSIONAL EXPERIENCES

EKLIPSE GG (PT. Main Games Indonesia)

Dec 2025 - Present

AI & Data Optimization Intern

- Developed user profiling prototype using Cosmos3 API and Qwen-8B API, analyzing 3+ users and 10+ video transcript to automate behavior analysis and support marketing campaign targeting; achieved 57% profiling accuracy.
- Improved training data quality and reliability by reviewing audio annotations, validating labels, coordinating re-annotation efforts, and maintaining quality control standards across AI training datasets.

Fruity Logic

Sep - Feb 2025

Full-stack Web Developer Intern

- Built a Laravel-based detection system using keyword matching and forward chaining to identify online gambling content injections on WordPress websites.
- Developed and assisting 3+ client's CMS websites across multiple industries using WordPress, Elementor, custom child themes, and WooCommerce.
- Improved website search readiness through technical SEO, on-page structure optimization, and performance tuning until 50%.

PROJECTS

WhatsApp Urgency Classification System (Thesis Project)

Python, FastText, Flask, MySQL, Fonnte, Baileys, SSE, VPS | [keyesa112/whatsapp-urgency-classification-fasttext](https://github.com/keyesa112/whatsapp-urgency-classification-fasttext)

- Developed a web-based system that automatically classifies incoming WhatsApp messages based on urgency levels.
- Built a real-time FastText-based model using Python to classify WhatsApp messages into urgent, normal, and non-urgent categories.
- Integrated Flask API, Fonnte webhook, Baileys listener (Node.js), and queue dashboard; achieved 79.21% accuracy and 83% urgent recall.

User Profiling System

Python, Cosmos3, Qwen8B, Prompt Engineering

- Developed an internal AI-powered user profiling pipeline to analyze and infer user behavior from gaming content.
- Designed the end-to-end methodology, including profiling framework, ground truth creation, evaluation metrics, and validation process.
- Leveraged VLM (Cosmos3), LLM (Qwen-8B), and Python to automate profile generation, achieving 57% overall accuracy.

URL Security Monitoring

Laravel, Corn Jobs, Que Workers, cPanel | <https://github.com/keyesa112/wordpress-monitoring-website>

- Developed a web-based dashboard using Laravel with queue workers and cron jobs to automate scheduled website security scans.
- Built an AI-assisted detection system that scans WordPress REST API endpoints using keyword matching to identify malicious content injections.
- Implemented a rule-based recommendation engine using forward chaining to classify detected injection types and provide appropriate remediation recommendations.

ORGANIZATIONAL & VOLUNTEER EXPERIENCE

HIMTI (Himpunan Mahasiswa Teknik Informatika)

Jan - Dec 2024

Secretary

Served as Head Secretary, coordinating 8 departments, ensuring structured documentation and on-time task execution, while leading event documentation and moderating a university-level webinar attended by 50+ participants.

IT Support Staff Volunteer

Oct 2024

Pekan Ilmiah Nasional 2024

Ensuring the functionality of digital presentation equipment during the 37th National Student Scientific Week (PIMNAS) 2024.

Technical Support Staff

Aug - Sept 2023

Fakultas Vokasi Universitas Airlangga

Provided technical support for the E-Diary DM Android app during diabetes self-management education sessions in a community outreach program.

ACHIEVEMENTS & CERTIFICATIONS

Best Paper Konverensi Nasional Vokasi 2024

Received the Best Paper Award for the research titled "Stroke Disease Management System Using the K-Nearest Neighbors (KNN) Algorithm."

Data Scientist Associate

BNSP Certified Associate Data Scientist (Kominfo - Digital Talent Scholarship, VSGA).
