

TALIDAH NUR KEYESA

Junior Website Developer | Laravel, Python, SQL, AI & Data Automation
Surabaya, Indonesia | talidahnurkeyesa@outlook.com

[linkedin.com/in/talidah-nur-keyesa](https://www.linkedin.com/in/talidah-nur-keyesa) | github.com/keyesa112 | keyesa-portfolios.pages.dev/

PROFESSIONAL SUMMARY

Final-year Informatics Engineering student with internship experience in web development, AI-assisted detection systems, and data optimization. Experienced in building Laravel-based applications, WordPress security monitoring tools, Python data pipelines, and SQL-based product analysis. Analytical problem solver with strong communication and collaboration skills, able to manage multiple responsibilities and perform effectively in fast-paced environments.

EDUCATION

Universitas Airlangga

2022 - Present

Undergraduate Informatics Engineering Student, GPA: 3.70/4.00

Relevant Coursework: Database, Database Programming, Machine Learning, Artificial Intelligence, Enterprise Resource Planning (ERP).

TECHNICAL SKILLS

Programming & Frameworks: PHP, Laravel, Python, Flask, JavaScript, Go, Fiber

Databases: PostgreSQL, MySQL, MongoDB

Backend & API: RESTful API, JWT Authentication, Queue Workers, Job Processing

Web & CMS: WordPress, Elementor, Astra Child Theme, Polylang

Data & Automation: SQL, Excel, BeautifulSoup, Selenium, Requests, Google APIs

Tools: Git, GitHub, Google Sheets API

PROFESSIONAL EXPERIENCES

EKLIPSE GG (PT. Main Games Indonesia)

Dec 2025 - Present

AI & Data Optimization Intern

- Analyzed Voice Command feature usage using SQL and Excel to uncover user behavior patterns, and opportunities for product improvement.
- Developed prompt-based clustering workflows using transcripts and clip descriptions to segment user behavior for marketing campaign targeting.
- Prepared and normalized Twitch and Google API video metadata, including URLs, titles, follower counts, and view counts, to support clustering analysis and product/model evaluation.
- Enhanced training data reliability by reviewing audio annotations, validating label quality, coordinating re-annotation, and maintaining quality control standards.

Fruity Logic

Web Developer Intern

Sep - Nov 2025

- Built a Laravel-based detection system using keyword matching and forward chaining to detect online gambling content injections on WordPress websites.
- Integrated detection logic into WordPress-based platforms to support automated security monitoring and suspicious content flagging.
- Developed and customized client CMS websites across multiple industries using WordPress, Elementor, custom child themes, and PHP-based widgets.
- Improved website search readiness through technical SEO, on-page structure optimization, and performance tuning.

PROJECTS

WhatsApp Urgency Classification System (Thesis Project)

Python, FastText, Flask, MySQL, Fonnte, Baileys, SSE | keyesa112/whatsapp-urgency-classification-fasttext

- Built a real-time FastText-based system to classify WhatsApp messages into urgent, normal, and non-urgent categories.
- Integrated Flask API, Fonnte webhook, Baileys listener, and queue dashboard; achieved 79.21% accuracy and 83% urgent recall.

Judol Scanner

Python, BeautifulSoup, Requests, Laravel, Forward Chaining | ai-deteksi-konten-judi-online-764zpj501.vercel.app

- Developed a rule-based system to detect online gambling content injections on WordPress websites.
- Parsed HTML content using keyword matching and forward chaining, achieving 92% detection accuracy.

Dkriuk Financial Management System

Laravel, MySQL, Google Sheets API | dkriuk.biz.id

- Built a financial monitoring system to automate data synchronization, transaction validation, and reporting between MySQL and Google Sheets.

ACHIEVEMENTS & CERTIFICATIONS

Best Paper Konverensi Nasional Vokasi 2024

Received the Best Paper Award for the research titled "Stroke Disease Management System Using the K-Nearest Neighbors (KNN) Algorithm."

Data Scientist Associate

BNSP Certified Associate Data Scientist (Kominfo - Digital Talent Scholarship, VSGA).
